

I don't understand how XM interferes with any other company since XM is a pay service. Being a pay service they should be able to offer their customers what they are looking for in a all-in-one radio, even if that includes weather forecasts. Weather is not something kept under lock and key, anyone can go outside and figure out what the weather is, so its pointless for one company to claim over another company for weather "rights". Please oppose/stop HR 4026 in congress.
